Introducing the PTX 1970

Manufactured to a high standard, the 1970's Rotary Dial Telephone looks just like the design classics of the past, but under the hood are modern electronics, ensuring your phone will work on any current telephone network.

Our designers have constructed a phone with an authentic rotary dial and yet incorporated both tone and pulse dialling into the electronics meaning your phone will even work with telephone banking where you have to choose a numerical option to proceed.

- * Authentic rotary dial
- * Incorporating both tone and pulse dialling
- * Will work with telephone banking
- * Authentic bell ringer (with on/off switch)
- * 12 month Warranty
