GSM	Full / Half Duplex, Remote Configuration, SMS Reporting
Analogue	Full / Half Duplex, Line Powered (no additional power supply required)

The RA711 vandal & weather resistant telephones are based on a stainless steel faceplate and provide clear handsfree, loud-speaking operation. Manufactured to a high standard, these telephones offer increased resistance to vandalism, and ensure that the primary function of communications is always maintained.

The RA711 has been designed to meet the needs of clients who experience loss through vandalism. However, the telephone is extremely simple to install and offers a convenient solution to a range of telephone siting problems in all locations. The RA711 is available with various keypad configurations; including full keypad, single, two and three button auto-dial options.

The RA711 is easy to program and has a non-volatile memory to ensure stored numbers are not lost when line power is disconnected. Additionally, the entire range offers a timed or auto-clear down function, preventing an off-hook or 'hung' condition.
