Product overview

Product description

Cisco is bringing a new standard to desk phones with a portfolio built for working in modern office environments. The Desk Phone 9800 Series was designed with IT and facilities in mind to deliver four new phone models and one Key Expansion Module (KEM). Included on each phone is the newly released PhoneOS software that simplifies the user experience and compliments our video portfolios RoomOS devices to give a seamless experience from desk spaces to meeting rooms. With expanded functionality – the 9800 Series combines secure enterprise calling, meetings, desk reservations, sustainability, and emergency notifications all in one device. You don't need to buy a

dedicated device for each feature – all the features are built into each phone.

The Desk Phone 9800 Series reduces the complexity of purchasing, deploying, managing, and training. To further simplify, you can use one device for Cisco Unified Communications Manager (CUCM), Webex Calling, Broadworks, or other 3rd party cloud calling platforms. Alongside our extensive portfolio of desk devices, the 9800 series is uniquely positioned in the market to help transform the workplace by bridging the gap between hybrid work, calling, and meetings – and is the most cost-effective solution for workstations at scale.

Features and benefits

Table 1. Features and benefits

FEATURE	BENEFIT
One platform with PhoneOS	<ul style="list-style-type: none"> One device and one software configured for all platforms – such as Cisco Unified Communications Manager (CUCM), Webex Calling, Broadworks, or other 3rd party cloud calling platforms. Deployments and setup easier for IT teams with the flexibility they require, providing a low-touch seamless experience to replace an existing phone with the 9800 series.
Desk reservation and hot desking	<ul style="list-style-type: none"> Desk reservation and hot desking allow your organization to make the most of office real estate. People using shared workspaces can reserve, book, and sign into a desk for the day via their phone. Native sign-in/authentication to enable users to personalize their space by accessing their contacts, calendar, meetings, and personalized settings.
Action button	<ul style="list-style-type: none"> Each phone has a built-in button that can be configured for any use case. Get immediate access to the things you need most such as emergency alerts, security, IT, front desk, broadcast/paging, and so many more.
Enhanced audio features including noise removal	<ul style="list-style-type: none"> AI noise removal for both send and receive sides. Increased audio quality with AI by converting narrowband audio to wideband audio. Built-in speaker is enhanced by a larger speaker driver and new bass-enhancing acoustic enclosure for more real, natural-sounding voices.
One button to join a meeting	<ul style="list-style-type: none"> Experience One Button to Push (OBTP) to quickly join any meeting from the device's screen (applicable when registered to Webex Calling).
Security	<ul style="list-style-type: none"> Security is core to the design, equipped with government-grade security, so communications are encrypted end to end. Featuring Trusted Platform Module (TPM) 2.0 hardware, plus top-of-the-line security features such as TLS 1.3, Secure Boot, Image Authentication, and more.
Sustainability	<ul style="list-style-type: none"> Leader for sustainable phones in the industry. Over 74% PCR, reduced and recyclable packaging, energy saving, and deep sleep features. Cisco takeback program which reduces e-waste and ensure that plastics can go back into recycled supply chain practices.

Platform support

Table 2. Cisco Desk Phone 9800 series backend calling server support

PLATFORMS SUPPORTED	CERTIFICATIONS
Cisco Webex Calling	Interoperability Tested and Certified
Cisco Unified Communication Manager (CUCM) 12.5 or above*	Interoperability Tested and Certified
Webex Dedicate Instance (DI)	Interoperability Tested and Certified
Broadworks	Interoperability Tested and Certified
Asterisk	Interoperability Tested and Certified

*Not all CUCM versions support Cisco Desk Phone 9800 Series natively, dev pack and device enabler file (QED) might be required.

Product specifications

Table 3. Product specifications

FEATURES	SPECIFICATIONS
Display	<ul style="list-style-type: none"> 9841: 3.5-inch Grayscale LCD, 384 x160 resolution, backlit 9851: 3.7-inch Color LCD, 480 x 240 resolution, backlit 9861: 5-inch Color LCD, 800 x 480 resolution, backlit 9871: 5-inch Color Touch LCD, 1280 x 720 resolution, backlit 9800 KEM: 5-inch Color LCD, 480 x 800 resolution, backlit
Audio (*may vary depending on the codec)	<ul style="list-style-type: none"> Frequency response: 100 Hz – 20 kHz for handsfree speaker FEC (Forward Error Correction) AEC (Acoustic Echo Cancellation) AGC (Automatic Gain Control) CNG (Comfort Noise Generation) VAD (Voice Activity Detection) PLC (Packet Loss Concealment) Silence Suppression* Acoustic Shock Protection (Handset/headset) Adaptive Jitter Buffer Dual Tone Multi-Frequency (DTMF) tone generation (RFC 2833 and in-band) Cisco HD audio, TIA-810/920 and ETSI ES 202 737/738/739/740 compliant

Table 3. Product specifications

FEATURES	SPECIFICATIONS
	<ul style="list-style-type: none"> • Cisco smart audio <ul style="list-style-type: none"> - Conventional and AI based background noise and voice removal for sending side - Conventional and AI based background noise removal for receiving side (9861 and 9871) - Enhances the in-call experience for PSTN calls by extending low-fidelity (narrowband) audio to high-definition (wideband) (9861 and 9871) • Ultrasonic support • HAC (Hearing Aid Compatible) handset
Audio codec support	<ul style="list-style-type: none"> • OPUS, G.722, G.722.2, iSAC, G.711(a-law/μ-law), G.729a/b, and iLBC
Physical Line Keys	<ul style="list-style-type: none"> • 9841: 4 • 9851: 6 • 9861: 10 • 9871: N/A • 9800 KEM: 20 (2 pages)
Maximum of supported line and programmable line keys	<ul style="list-style-type: none"> • 9841: 4 • 9851: 46 • 9861: 130 • 9871: 128
Maximum of supported SIP lines	<ul style="list-style-type: none"> • 130 for CUCM and Webex DI • 16 for Webex Calling and Open SIP platforms
Hard keys	<ul style="list-style-type: none"> • Action button • Calendar button (9851 and 9861) • Favorite button • Hold/Resume, Transfer, and Conference keys • Application key • Directory key • Standard keypad • Volume-control toggle key • Speakerphone, Headset, and Mute keys • Navigation and Select key (9841, 9851 and 9861) • Home button (9871 only) • Page keys (9800 KEM only)

FEATURES	SPECIFICATIONS
Backlit indicator	<ul style="list-style-type: none"> The phones support backlit indicator for the physical buttons of Speakerphone, Headset and Mute, Calendar (9851 and 9861), Select (9841, 9851 and 9861) and Home (9871 only) as well as the line keys. The phones also support two specific LEDs, Front arc LED and Top LED, to indicate the device status, including message waiting, missed call, hot desk availability, etc.
Handset	<ul style="list-style-type: none"> Wideband-capable audio handset (connects through the phone's dedicated handset RJ-9 port). The handset coiled cord has a custom end for concealed cable routing beneath the phone (cord length is approximately 21 in. [55 cm (about 1.8 ft)] coiled and up to 72 in. (183 cm (about 6 ft)) extended). The handset is Hearing Aid-Compatible (HAC) and meets Federal Communications Commission (FCC Part 68) loudness requirements for the Americans with Disabilities Act (ADA). You can achieve Section 508 loudness requirements by using industry-standard inline handset amplifiers such as Walker Equipment W-10 or CE-100 amplifiers.
Dial pad	<ul style="list-style-type: none"> The dial pad is ADA-compliant.
Speakerphone	<ul style="list-style-type: none"> The full-duplex speakerphone provides flexibility in placing and receiving calls handsfree. For added security, the audible Dual Tone Multifrequency (DTMF) tones are masked when the speakerphone mode is used.
USB and Aux port	<ul style="list-style-type: none"> 9841: <ul style="list-style-type: none"> One USB-A port: The USB-A port provides 0.25A power output at 5V or 1.25W under PoE, and 0.5A power output at 5V or 2.5W when using the Cisco Power Adapter 3 (local power supply). One Auxiliary port (console log collection only). 9851: <ul style="list-style-type: none"> One USB-A port: The USB-A port provides 0.5A power output at 5V or 2.5W under PoE, and 1A power output at 5V or 5W when using the Cisco Power Adapter 3 (local power supply). One USB-C port: The USB-C port provides 0.5A power output at 5V or 2.5W under PoE or when using the Cisco Power Adapter 3 (local power supply). 9861 and 9871: <ul style="list-style-type: none"> One USB-A port: The USB-A port provides 0.5A power output at 5V or 2.5W under PoE, and 1.3A power output at 5V or 6.5W when using the Cisco Power Adapter 3 (local power supply). One USB-C port: The USB-C port provides 0.5A power output at 5V or 2.5W under POE or when using the Cisco Power Adapter 3 (local power supply).

FEATURES	SPECIFICATIONS
	<ul style="list-style-type: none">• 9800 KEM:<ul style="list-style-type: none">- One USB-A female port:<ul style="list-style-type: none">- When one 9800 KEM connected with the 9851, the USB-A port provides 0.15A power output at 5V or 0.75W under PoE, and 0.5A power output at 5V or 2.5W when using the Cisco Power Adapter 3 (local power supply).- When one 9800 KEM is connected with the 9861 or 9871, the USB-A port provides 0.15A power output at 5V or 0.75W under PoE, and 1A power output at 5V or 5W when using the Cisco Power Adapter 3 (local power supply).- When two 9800 KEMs are connected with the 9861 or 9871, the USB-A port provides 0.5A power output at 5V or 2.5W when using the Cisco Power Adapter 3 (local power supply).- When three 9800 KEMs are connected with the 9861 or 9871, the USB-A port provides 0.15A power output at 5V or 0.75W when using the Cisco Power Adapter 3 (local power supply).• One USB-A male port: The USB-A port on 9800 KEM draws power from the phone's USB-A port under PoE or when using the Cisco Power Adapter 3 (local power supply).• The charging capability depends on the maximum output power of the USB port on the phone in various deployment modes. If a connected device attempts to draw more power than the USB port's maximum output, a warning message will pop up, prompting you to unplug the device.
Ethernet switch	<ul style="list-style-type: none">• An internal 2-port Cisco Ethernet switch allows for a direct connection to a 10/100/1000BASE-T Ethernet network (IEEE 802.3i/802.3u/802.3ab) through an RJ-45 interface with single LAN connectivity for both the phone and a co-located PC.• The system administrator can designate separate VLANs (IEEE 802.1Q) for the PC and phone, providing improved security and reliability of voice and data traffic.

FEATURES	SPECIFICATIONS
Bluetooth® wireless Technology*	<ul style="list-style-type: none"> • The 9861 and 9871 (excluding no-radio variants) feature Bluetooth wireless technology <ul style="list-style-type: none"> - Bluetooth version: 5.2 (Bluetooth® Low Energy) - Bluetooth Enhanced Data Rate (EDR) - Bluetooth Class 1 - Support for Wideband and Narrowband codecs - Bluetooth Profiles: <ul style="list-style-type: none"> Hands-Free Profile (HFP) Advanced Audio Distribution Profile (A2DP) Human Interface Device Profile (HID) Phone Book Access Profile (PBAP)
