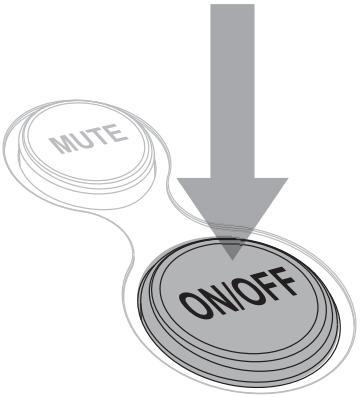
6 How to use

How to Make a Receive Calls using the ON/OFF Button



1. Make a Call

- Push 'On/Off' Button for a dial tone then dial the telephone number.

2. Receive a Call

- Push on/off button to open a line
- Push the on/off button to end your call

How to Make & Receive Calls using the Control on the Headset Cord

- Some Headsets have a built in circuit to open the line on the cord.
- It also allows you to mute & control incoming volume.
- Push mute-on & off / Volume control on the headset cord. (Detailed information on p.17 How to use headset)

6 How to use

How to use functions

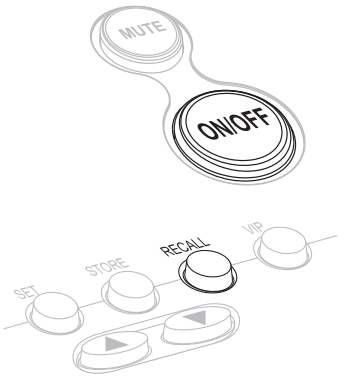
There are various Functions for Convenience.

1. To Use Speed Dial

You have 10-number Speed Dial.

a. How to Save a Speed Dial

- Push 'On/Off' Button
  when 'On Hook' (Not on a call)
- Push 'Store' Button in Primary
  Function area
- Dial Numbers to be Saved
- Push 'Store' Button again
- Then Push (0~9) to correspond
  with selected speed dial number.
  Push on/off button to complete Function.



b. Make a Call Using Speed Dial

- Push 'On/Off' Button to open the line
- Push 'Recall'
- Press pre saved speed dial number to be dialed
- Call will automatically dial

6 How to use

2. Book Memory

This function is proper for those who want to save
the number only without speed dial.

a. Save the Number

- Please let phone be in 'OFF Hook'.
- Press Numbers to be saved.
- Press Book button, then the number will be saved.

b. Call the saved number

- If you press 'Book' button when 'OFF Hook', you can see saved numbers. By pressing 'Book' button repeatedly, Display window shows user all numbers they have saved before.
- Just press 'ON/OFF' button once you find the number to call. if then, the number you have selected will be dialed automatically.

3. IP Memory

User can enter pre-fixed number through IP function. It's recommended to use under Extension circumstance. It's useful for those who use '0', '9' or longer number (e.g. local service number) for outgoing call often. the number only without speed dial.

Please press IP button, and then press the number to be pre-fixed.

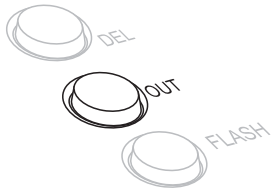
Use IP function

- Please press the On/Off button for dial tone.
- Press IP button, and the pre-fixed number will be dialed automatically.
- Then user dials the telephone number to the pre-fixed number.

6 How to use

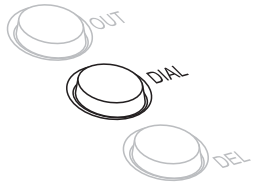
3. Search 'Outgoing Call Number' & Make a Call

The last 30 outgoing calls are automatically saved. You can sarch through the last 30 outgoing calls and make a call directly from the list.



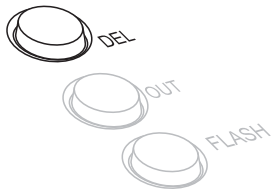
a. Search Outgoing Call Numbers.

- Push 'Out' Button at 'Secondary Function Buttons' Area.
- Then, use "▲", " ▼" Buttons to select number.
- The number is shown as per picture on the left. (Displays Communication Time & Order)



b. To Make a Call

- Push 'Out' Button at the Secondary Function Button Area.
- Then, use "▲", " ▼" Buttons to select number.
- Push 'Dial' to make a call.



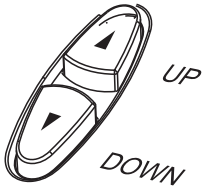
c. Delete 'Outgoing Number Called'

- Search Outgoing Call Number to delete as above 'a' & 'b'.
- Push 'Delete' to remove the number. Once the number to be deleted appears on screen.

6 How to use

4. Search 'Receive Calls Number' & Make a Call

You can save 100 numbers of received incoming calls. Moreover, you can search the numbers and make a call directly by picking up the line pressing the 'ON/OFF' button. (You must subscribe for 'Caller-ID Service' in your local area from your telephone servic provider.)

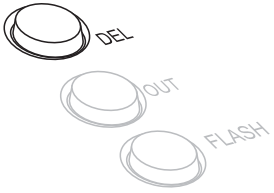


a. Search 'Received Call

- Use "UP", "DOWN" Buttons to select number.
- The number is shown as the picture on the left. (Displays communication time & order of received callers)

b. To Make a Call

- Push 'ON/OFF' Button at the Secondary Function Buttons area to make a call.

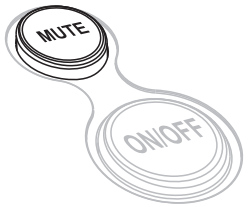


c. Delete Receive Calls from Memory

- Push 'Delete' Button to remove number.

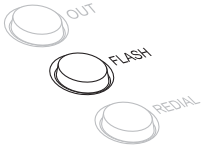
6 How to use

5. Using 'Mute' Function



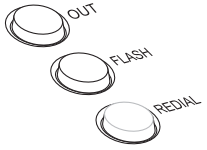
- If you need to put a call on hold, push the Mute button.
- When you are ready to start your call, Push 'Mute' Button again.

6. Using 'Flash' Function



a. connects to a single line application

- Push 'Flash' to answer call waiting line (You have to register for 'Call Waiting' with your local area telephone service provider.)

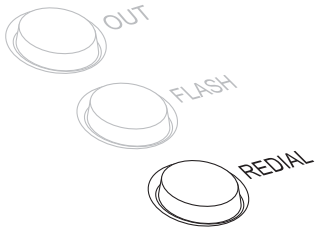


b. connects to a Multi-Line Telephone System

- Push 'Flash' Button to connect for another Extension Number.
- Dial extension number.
- Then, signal sound is ringing, push 'On/Off' button for Off-Hook.

6 How to use

7. Using 'Redial' Function

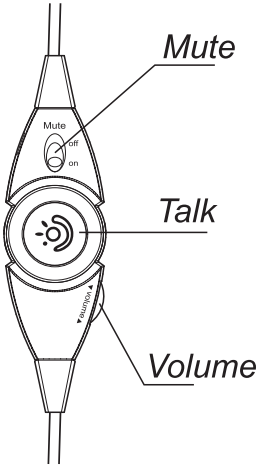


a. How to make a call using 'Redial'

- Push 'Redial' Button at the Secondary Function button area to make a call.
- You can use the function while your Telepad is Off-Hook. (Not on a call)

How to use 'Headset' *(*Optional)*

The Headset 'in line' feature buttons allows you to open & close the line without using the key pad. It also has a volume control and mute switch.



Mute When you slide Mute Switch 'ON', microphone mute function is started.

Talk When you make a call or receive a call, just push this button.

Volume Speaker Volume Control
