

# Smart Phone Recorder

Simple and reliable voice recording for any smart phone that has the 4 pole audio socket.

## Easy Connectivity

Simple to connect to any smart phone that has the 4 pole audio socket. Please ensure that you check this before placing an order as there is a restocking charge. Record on demand via a simple slide switch on unit.

## Excellent data storage

20 hours recording time in single charge. 72 hours recording on 2GB, or 144 on 4GB version. 99 individual recording files held on internal memory. Data easily transferred to your PC, freeing up the memory on the unit for more calls to be recorded.

## Recording modes

Can record even when a call is not in progress, making it a handy meeting recorder or memo recorder. VOX, voice operation mode. Play back via recorder or PC/Laptop once calls are downloaded.

## Product Specifications

Charging time is approximately 2.5 hours. Comes with USB cable, wired remote control and earphone for private listening. Unwanted calls can easily be deleted. (once a call is deleted it cannot be recovered)
