

Polycom Soundpoint 331

Device overview

The SoundPoint IP 331 is a two-line SIP phone that delivers superb sound quality as well as a wide range of supported business telephony features. The SoundPoint 331, with its dual-port 10/100 Ethernet switch for LAN and PC connection, presents a cost-effective solution for cubicle workers as well as call centre operators.

Highlights and key features

- HTTPS secure provisioning
- Full-featured two-line business class IP phone
- Integrated PoE support
- Full duplex speakerphone with acoustic clarity technology
- 102 x 33 pixel graphical LCD
- 15 dedicated hard keys, 3 context-sensitive soft keys
- Certified SIP call control

Feature overview

Superb sounds quality – The SoundPoint 331 features a full duplex IEEE 1329 Type 1-compliant speakerphone with Polycom’s legendary Acoustic Clarity technology, delivering excellent sound quality and enabling noise-free and echo-free conversations that are as natural as talking face-to-face.

Efficient installation – The SoundPoint 331 phones are engineered to make installation, configuration and upgrades as simple and efficient as possible. Built-in IEEE 802.3af PoE circuitry and a dual port Ethernet switch enable flexible deployment options and savings on cabling expenses.

Enterprise-grade feature set – The SoundPoint 331 delivers an intuitive user interface through a full feature set encompassing traditional business telephony features such as call hold, park, pick-up, transfer and three-way local conferencing, as well as more advanced capabilities such as Shared Call Appearance and Call Control Toolbar Integration.

Secure provisioning – The SoundPoint 331 provides encrypted provisioning information using HTTPS to secure communication between the user and the service provider. The secure remote provisioning software provides a highly secure mechanism for configuration and the device software upgrades.

Availability
