

Call Diverter 1500

The 1500 can automatically divert calls to mobiles or other landlines – ideal for when you're away from the office or outside of office hours. No need to pay BT's Divert Set Up and Call charges

It can also be used to manually divert a call to another number when attached to the extension of a PBX system. Any member of staff can divert/transfer a call to another landline or mobile. It can also be used to make calls from a traditional landline phone over a mobile network so converting a landline to mobile call into a mobile to mobile call

The Orchid 1500 can accommodate 2 numbers: one for your Mobile SIM card and one for your landline (PSTN) number.
