EXP20

Expansion module for T27P and T29G
Large graphic LCD screen with backlight
20 physical buttons, dual colour LED
Two pages of 19 programmable buttons
Adjustable stand with two angles

High-Performance LCD Expansion Module

The EXP20 is designed to match the style and feel of the T27P and T29G advance IP phone handsets. Equipped with a large user-friendly LCD interface and 20 physical dual-colour LED keys, the EXP20 offers simplified user navigation and streamlines essential operational functions such as speed dial, BLF, BLA, call forwarding, transfer and hold.

Up to 6 EXP20 expansion modules can be connected making it the ideal solution for receptionists, administrative assistants or contact centre workers who need to monitor and manage a large volume of calls on a regular basis. More than two units need to be powered by a conventional power supply.

EXP20
