

T600 Acoustic Hood

Environment

The T600 telephone hood has been designed for use in noisy locations, or where privacy is required.

Manufacturing

Fabricated from zintec steel with a light grey powder coat paint finish the hood is tough and its compact size keeps wall space required to a minimum. The 25mm wall cavity is lined with class 'O' fire retardant foam which gives the hood up to 16dB noise reduction.

Mounting

Telephones can be positioned on the shelf or wall mounted in the back of the hood, for heavier phones the optional extra steel mounting plate can be fitted.
