

Sennheiser Business Solutions

Wired Headset Solutions

SENNHEISER

Every word matters.

Even in the busiest working environments, clearly understandable conversations are an absolute must for today's business communication. However, perfect speech intelligibility is only one part of enabling you and your listener to stay focused on your tasks. The usability of your device also has a strong impact on your day to day business.

Sennheiser headsets deliver unparalleled sound, and also best-in-class ease of use. Combined with their high-grade design, they make a real difference in business communication.

With the right choice of materials and exceptional craftsmanship, every Sennheiser headset is built to last. Giving you a highly comfortable wearing experience that will improve the quality of your working day and boost your productivity.

The simple and secure solution

A wired headset solution is ideal for desk-centric users who perform all their daily tasks at their workstation. The Sennheiser portfolio of wired headsets is ideal for contact centers, offices and Unified Communications professionals – where users are mostly stationary.

No density limits

A wired headset solution has no limitation on the number of users in a given space, and can safely be used alongside DECT and Bluetooth® solutions without causing density issues. It's also a highly secure solution as users' conversations are transmitted physically via a cable. Simple to use, with no battery or charging, a wired solution is as easy as it gets, with plug and play connectivity.

Safe, clear and comfortable for all phone types

All wired headsets feature Sennheiser Activegard® technology to protect users from acoustic injury and Sennheiser Voice Clarity for a more natural and relaxed listening experience. Sennheiser offers wired headsets for traditional desk phones and softphones as well as mobile devices. The wide range of wearing styles and ear pads make it simple to find a headset that you can wear comfortably all day.

BENEFITS & FEATURES

- **Natural listening experience**
With Sennheiser Voice Clarity
- **Perfect speech output**
Ultra noise-cancelling microphone
- **Outstanding sound quality**
High-quality neodymium speaker
- **High-quality durable design**
Brushed aluminum and stainless steel components
- **Extreme durability**
Unibody headband construction for maximum strength at stress points
- **Exceptional wearing comfort**
Large leatherette ear pads for all day comfort and powerful sound
- **Personal fit**
Extension headband with number indications for accurate adjustment
- **Easy to store and bring along**
With fold-flat ear cups and carry pouch
- **Acoustic shock protection**
ActiveGard® technology protects users against acoustic injury caused by sudden sound bursts on the line
- **Peace of mind**
3 years' international warranty

Circle™ Series

The working tool
for all day performance

Sennheiser's Circle™ Series, our popular range of robust, wired headsets, has proven to be a lasting favorite with contact centers, offices and Unified Communication professionals around the world – and for good reason: In increasingly stressful workplaces, being able to hear and be heard clearly is critical to performance – and long-term comfort is essential for all day users to maintain their focus and energy.

With Sennheiser Voice Clarity, noise-cancelling microphone for noisy environments and a lightweight, ergonomic design for all day use, a Circle™ headset is simply the perfect tool when clear communication and long-term user comfort are crucial to the job in hand.

Culture Plus Series

Activate your potential

Culture Plus headsets make a great impression: From their contemporary styling to their superb sound, they excel in all areas – even on the go around the office. With eye-catching design, instant-fit features and a choice between acoustic foam ear pads or soft leatherette covers, Culture Plus gives you a comfortable and flexible transition to the new UC environment. Add the productivity benefits of Sennheiser Voice Clarity, noise-cancelling microphones for optimized speech and special sound enhancement profiles and you have the ideal introduction to a new communication culture.

The wide range of variants within the series can cover all your needs for mobility and flexibility during your busy work day – making it the perfect headset series for achieving a rapid, sustained adoption of your UC solution.

Culture™ Series

Everybody deserves
Sennheiser sound

The Sennheiser Culture™ Series headsets are specially designed as a deployment-friendly solution for enterprises transitioning from traditional telephony systems to Unified Communications.

All Culture™ headsets offer Sennheiser Voice Clarity for a more natural listening experience and quality sound. Combine this with its lightweight design and comfort enhancing details for an experience you'll appreciate immediately.

When changing from a traditional system to a Unified Communications environment, high quality, easy to use tools, with their richer and more rewarding experience make it easier for users to understand the benefits of change – which makes the transition simpler and more productive. Combine this with plug and play implementation, and you have the ideal deployment headset.

A photograph of two women in a professional setting. The woman on the left has brown hair and is wearing a dark purple blazer over a dark blue polka-dot shirt. She is holding a blue mug with both hands. The woman on the right has blonde hair and is wearing a dark blue collared shirt. They are both looking towards the right side of the frame. In the background, there are wooden beams and a blurred screen. A laptop is visible on the table in front of them.

Our Sound Technologies

Innovation you can hear

Voice Clarity technology

The natural listening experience

For the best possible communication between caller and listener, Sennheiser Voice Clarity uniquely enhances the most important frequencies and details of the human voice. For the caller, sound is crisper and clearer, allowing them to hear the nuances contained in spoken conversation; for the listener, a noise-cancelling microphone sends the clearest signal to improve speech intelligibility. In combination this results in better, more natural sounding conversations where no important details are lost.

Play sound
without
Voice Clarity

Play sound
with
Voice Clarity

ActiveGard® technology

Hearing protection

During the course of a day, headset users may be exposed to seldom, but hazardous incoming noises that can be dangerous to their hearing. Technically referred to as a sound burst, this can potentially cause long-lasting damage to the human ear. To safeguard users, all Sennheiser headsets for contact center and office environments are equipped with innovative ActiveGard® technology.

Please be warned that the sound without ActiveGard® can be extremely high. We recommend the volume should be set low when playing.

Play sound
without
ActiveGard®

Play sound
with
ActiveGard®

Noise-cancellation technology

Optimum speech clarity

To reduce background noise, filter out disturbing ambient noise and enable crystal clear telephone conversations, Sennheiser headsets have noise-cancellation technology incorporated in the microphones.

Certain models in the range offer ultra noise-cancelling microphones, which are able to improve voice transmission in particularly noisy environments.

Easy Disconnect feature

Flexible use

Easy Disconnect (ED) is the plug that connects Sennheiser wired headsets to desk phones, mobile phones or a UC/Skype for Business solution via the correct bottom cable. Sennheiser's wired headsets with Easy Disconnect is ideal for contact centers and hot-desking environments, where users frequently change shifts or switch between workstations.

With its simple quick-release mechanism, the durable Easy Disconnect plug is designed to withstand the daily wear and tear of shift changes and provides a long-lasting alternative to plugging and unplugging headsets directly into a computer's USB port.

- **Workplace flexibility** for hot-desking offices and contact centers with frequent shifts
- **User flexibility** the Easy Disconnect plug provides walkaway convenience
- **Durable design** designed to withstand the repetitive plugging and unplugging of shift changes

Sennheiser HeadSetup™ Pro Manager

Keep in touch with your business

Save valuable time on unnecessary tasks and make life simpler and smarter for your IT department, your business and your colleagues. By keeping you in touch with your Sennheiser devices, Sennheiser HeadSetup™ Pro Manager puts you in control of three key areas:

Asset Management

Find out who, what, where, when – from wherever

From one location you get full visibility of all Sennheiser headsets and speakerphones deployed in your organization.

Get a perfect overview of both active and inactive devices as well as non-Sennheiser devices to identify who is registered as the owner of an audio device and who is using it. By tracking who has which kind of headset or speakerphone – and how and when they are being used – you can easily re-allocate unused headsets elsewhere in the organization – in order to manage your resources effectively and improve productivity.

With the report function, it is possible to extract reports on device usage and firmware compliance to get full control of your inventory and gain insights into the company's UC environment.

Update Management

Smart, easy and convenient

A flexible and cost effective way to get the latest firmware updates to all your organization's Sennheiser devices, whenever it's convenient for you and your end-users.

Push new updates to an unlimited number of devices across your organization from one simple dashboard. Schedule your automated updates to cause minimum downtime and disruption for your company's workflow.

Configuration Management

One tool puts you in control

The centralized configuration option allows all settings to be controlled from the IT department, ensuring that headset users experience a simple plug and play solution.

You can centrally push configurations or lock specific specifications on Sennheiser devices to comply with regulatory compliance settings for specific groups or individuals.

Sennheiser HeadSetup™ Pro Manager for IT administrators

Sennheiser HeadSetup™ Pro Manager has been developed for companies with a need to control their UC environment in a fast and secure way. By installing the client application, Sennheiser HeadSetup™ Pro, on your end-users' PCs, you gain a complete overview of all deployed devices and access to new updates and settings.

For companies with more locations, it's possible to manage, update and control settings for all end-users in the entire organization. For improved security, all communication and data are encrypted and no sensitive data is stored.

The resulting simplification of the asset, update and configuration management gives great savings in both time and money.

Sennheiser HeadSetup™ Pro for headset users

Sennheiser HeadSetup™ Pro is the client application running in the background on the headset users' PC. The solution ensures that Sennheiser headsets and speaker-phones work seamlessly with various leading softphones and give you access to latest firmware updates and personalized settings.

Sennheiser HeadSetup™ Pro is uniquely configured to either work together with a signed-up company account on Sennheiser Sennheiser HeadSetup™ Pro Manager or as a stand-alone application for smaller companies or personal use.

Sennheiser HeadSetup™ Pro is designed to be simple to use, allowing Sennheiser headset and speakerphone users to enhance their experience and productivity simply and quickly.

www.sennheiser.com/headsetcompatibility

Glossary

Sound Quality

Sennheiser Voice Clarity uniquely enhances the most important frequencies and details of the human voice. For you, sound is crisper and clearer, allowing you to hear the nuances contained in spoken conversation – and for your listener, a noise-cancelling microphone sends the clearest signal to improve intelligibility. In combination, this results in better, more natural sounding conversations where no important details are lost.

Wideband audio technology operates in the extended frequency range of 150–6800 Hz and offers higher quality speech transmission than narrowband. To be able to use wideband, all components of the communication line must support this standard (PPX, mobile network operator etc.).

Narrowband audio technology operates in the 300–3400 Hz frequency. As many traditional desk phones only support these narrowband frequencies, we have a range of narrowband headsets, which get the best performance available from this standard.

Noise-cancellation technology is incorporated in our microphones to reduce background noise, filter out disturbing ambient noise and enable crystal clear telephone conversations. On certain models in our range we offer ultra noise-cancelling microphones, which are able to improve voice transmission in particularly noisy environments.

Low impedance Some desk phone/devices have low impedance output which means that the speaker output is lower than most devices. Devices with low impedance output need a headset which compensates for the lower speaker output to ensure the same sound level as for most devices.

Hearing Protection

ActiveGard® hearing protection technology protects users from the potential danger of acoustic injury from unexpected and sudden sound bursts on the line. ActiveGard® is like a fast-acting intelligent volume control. If an incoming signal rises to a level that is harmful to your hearing, it is instantly reduced to a lower, and more comfortable level. When the sound level returns to normal, the volume returns to the original level.

Noise at Work Limiter

Directive 2003/10/EC The objective of this Directive is to lay down minimum requirements for the protection of workers from risks to their health and safety arising or likely to arise from exposure to noise and in particular the risk to hearing. The Directive defines the physical parameters that serve as risk predictors, such as peak sound pressure, daily noise exposure level and weekly noise exposure level. It sets exposure limit values and exposure action values in respect to the daily and weekly noise exposure level as well as peak sound pressure. The exposure action value is fixed at 80 decibels (lower value) and 85 decibels (upper value). Source: www.osha.europa.eu/en/legislation/directives/82

Unified Communications

UC Optimized means that headsets and speakerphones are compatible with major Unified Communications platforms and softphone brands. Unified Communications brings together a company's voice, text and video based communication under one unified solution. The advantages of a Unified Communications solution include enhanced overall efficiency of a business through increased productivity and mobility, resulting in a positive return on investment.

Other

Easy Disconnect (ED) is the plug that connects Sennheiser wired headsets to desk phones, DECT terminals and mobile phones or a UC/Skype for Business solution via the correct bottom cable. Disconnect the headset from the bottom cable, simply by pressing the ED plug. The spring loaded contacts in the ED plug ensure reliable connection in everyday use.
