

Bluetooth 5.0 USB Dongle Adapter

In the Box

1 x Bluetooth 5.0 USB Dongle Adapter

QUICK START GUIDE

1. Plug the USB connection on the Bluetooth Dongle into your PC, Mac or device.

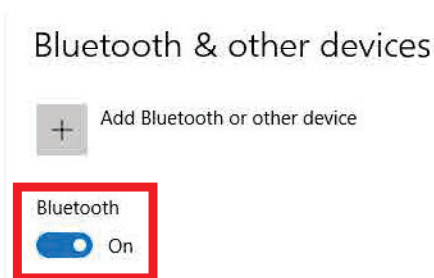

Once it is inserted into your PC/Laptop it will discover the dongle automatically. You may hear a noise to confirm this and the device will be called "dongle"

The Bluetooth Dongle is powered via USB Port

2. Search for "Bluetooth & other devices" on your PC and select it

3. Ensure that Bluetooth is turned "**On**" with the blue switch (Pictured below)

The dongle icon will now display in 'Other devices'

4. Put your device (Headset, Speaker etc) into 'pairing mode' as per the devices instructions.

5. Now click "+ Add Bluetooth or other device" on your PC or Laptop

6. Now click on "Bluetooth" the dongle will search for you and once it appears, click the device name to pair.
