

## Standard License Included with all Project Telecom 4G Radios

# WalkieFleet

### 12 or 36 Month License Options

**The professional, enterprise grade, mobile communication solution.**

- Hosted on professionally supported, regularly updated and fully backed-up servers, all located in specialist UK based datacentres.
- Configured to minimise latency and deliver optimal quality and performance. We don't burden our servers by running dispatchers as a web service 'in the cloud'.
- WalkieFleet is manufacturer neutral, allowing you to complement our great communication solution with the best devices for you and avoiding manufacturer owned ecosystems, technology limitations and pricing demands.
- Concurrent user licensing means you only pay for what you need. Share one account with different users at different times.
- UK based front-line support through an experienced and established professional communication supplier.
- Add our specialist eSIMs for the most reliable communication solution.
- Flexible subscription options to suit your budget and requirements.
- Free Android and iOS device applications for maximum compatibility - install on as many devices as you wish.
- Fully secure - TLS data encryption is standard and AES-256 encryption is optional for maximum security.
- Redundancy server option for virtually 100% uptime and maximum availability.
- Backed by a highly skilled and experienced team of software developers with regular updates, features and enhancements.
- Enterprise version available for installation on private servers (cloud or on-site).
- Fully GDPR compliant - all data is stored and controlled in the UK.
- Tailored support options, including out of hours, device MDM and remote device management.
